FINAL		Patient Care Report	
		MOBILE MEDICAL RESPONSE 834 S WASHINGTON AVENUE SAGINAW, MI 486012566 (989) 755-1955 Ext.	
		Run Number: 26733 Date of Service: 04/10/2012 Patient Name: John Doe	
TREATMENT SUMMARY (CONTINUED)			
Time	PTA	Treatment	Who performed
16:28	IV		UNSPEC, STUDENT PARAM
		Site=Left A.C. Size=18 G Number of Attempts=1	Solution=Saline Flush Result=Unsuccessful
			Comments: Proper aseptic technique, positive flash will not flush Tubing=IV Cap Type=IV
Time	PTA	Treatment	Who performed
16:30	IV		REVIS, ALVIN
		Site=Right A.C. Size=18 G Number of Attempts=1	Solution=Saline Flush Result=Unsuccessful
			Comments: Proper aseptic technique, positive flash will not flush Tubing=IV Cap Type=IV
Time	PTA	Treatment	Who performed
16:32		Intraosseous Infusion	UNSPEC, STUDENT PARAM
		Intraosseous Site=Right Lower Leg Intraosseous Solution=Normal Saline	Intraosseous Result=Unsuccessful Intraosseous IV Bag Size=250 cc
			Comments: Proper aseptic technique. IO needle tip bends upon insertion attempt. Intraosseous Size=Intraosseous Needle
Time	PTA	Treatment	Who performed
16:40		Intubation	UNSPEC, STUDENT PARAM
		Size Tube=7.5 Type=Oral	Attempts=1 Successful/Unsuccessful=Unsuccessful
			Comments: Proper aseptic technique. Immediately following intubation equal chest rise is observed and pt is prematurely moved to the backboard. See narrative. Indication=Cardiac Arrest
Time	PTA	Treatment	Who performed
16:45		King Airway	UNSPEC, STUDENT PARAM
		Indication=Cardiac Arrest Result=Equal Breath Sounds	Attempts=1
			Comments: Proper aseptic technique. Symmetrical chest rise and fall. Secured with commercial device. Successful/Unsuccessful=Successful
NARRATIVE			
<p>Alpha 2 dispatched priority 1 to listed intersection for an unknown medical. PD is on scene, no further information. Upon arrival at the intersection several police vehicles are noted to be in the area, the southbound lane of Washington and lining both the north and south sides of Gilmore St. Bystanders are gathering around the scene and along the east edge of Washington. Police officer on scene indicates which patrol car the pt is in and another patrol car is moved further south on Washington to make room for the ambulance. PD advises EMS upon exiting the ambulance that PD was responding to reports of a suspicious person attempting to break into vehicles and that during the course of the incident the subject was tased 5 times. PD states the subject had smoked 20 rocks of crack cocaine. Subject is seen lying supine and handcuffed in the back of the patrol vehicle. Pt contact is initiated and responsiveness cannot be solicited to painful stimuli. Breathing is noted to be absent and carotid pulse cannot be palpated. PD assists in pulling the pt from the back of the patrol car onto the grass between the sidewalk and street. CPR is initiated, ventilations are performed via BVM and high flow oxygen, and Drug box is retrieved from the ambulance. Initial rhythm is asystole which remains unchanged throughout arrest. Other interventions are as listed above. ET tube is established and first round epi is prepared to be administered via ET tube. PD on scene attempting to maintain crowd control states that the scene is no longer safe and that EMS needed to clear out. While attempting to confirm placement and secure the ET tube, the pt is rapidly moved to a back board by PD and EMS then assists in securing the pt, lifting the pt onto the stretcher and into the back of the ambulance. Compressions immediately resumed in the back of the ambulance and continued throughout transport by Officer Ben Krzyminski. ET tube is noted to be epigastric and pt is reintubated with a King Airway. Pt care is turned over at SMMC-S ER. Alpha 2 clear.</p>
